

Recommended Components

"What equipment do you recommend for my new kit?" "What hop-ups can improve my kit's performance?"

We've provided two lists to help you decide on components for both newly-purchased and existing kits. **Starting Out** has suggestions for stock-racing components not included with the kit. **Hop-ups** has suggestions for upgrading components to a higher level of performance for modified racing. If you are a getting a kit for the first time, use the Starting Out tables.

Print out this list and go shopping! Support your local hobby shop.

This list is accurate as of 1/2001. Recommendations and components may change without notice.
