

Hébert Dominates!

Reedy would like to congratulate factory driver Keven Hébert on his spectacular performance at the 2008 Jaco/SMC Canadian Challenge. World-famous Fastcats Raceway in the Canadian province of Ontario once again played host to a field of world-class racers from throughout North America.

When all was said and done, Hébert sat on the pole for both the TC Modified and TC 19T/10.5 classes en route to convincing wins in both classes. To achieve these great results, car and driver must be in perfect form. Any shortage of power will spell doom.

For maximum power and duration, Keven utilized Reedy's VMX Concept R-46 IB4600 cells. Voltage enhanced using our exclusive hardware, and matched using industry standard CE equipment, these competition cells completed the winning package.

Final Podium Results

TC Modified

1. Keven Hébert (TQ)
2. Josh Cyrul
3. Barry Baker

TC 19T/10.5

1. Keven Hébert
2. Ray Darroch
3. Paul Ciccarello

Products used:

- #675 VMX Concept R-46 Matched 6-cell
- #651 Silver Battery Bars
