

Reedy LiPo 5000 Powers Cactus Classic Champion!

Reedy is pleased to announce that factory team driver Jake Thayer claimed victory in the SRS Buggy class at the 2008 Cactus Classic at SRS Raceway in Scottsdale, Arizona. The SRS classes are unique and progressive. To showcase the latest technology, these buggies race 15-minute A-main events which are perfectly suited for the latest Reedy LiPo batteries and LRP brushless motors.

Jake's Team Associated FT B4 was the class of the field. A combination of a Reedy 5000 LiPo battery, LRP Sphere Competition ESC, and LRP Vector Stock Spec 10.5 motor powered the Arizona-based driver across the finish line before all others with no fade or dumping thanks to the efficiency of this combination. And if that is not enough, the combination is virtually maintenance-free when used correctly.

Racing has never been easier or more enjoyable!

Equipment used:

- #704 [Reedy LiPo 5000mAh](#)
- #LRP50830 [LRP Vector X-11 Stock Spec 10.5](#)
- #LRP41552 [LRP Pulsar 3 Competition Charger](#)
- #LRP80700 [LRP Sphere Competition ESC](#)
