

For Immediate Release. May 8, 2008

Reedy LiPo 3200mAh 11.1V With TRA Connector

For the ultimate in power and top speed, Reedy is excited to announce an all-new 11.1V 20C LiPo battery for enthusiasts that believe you can never have too much power. More voltage equals more power and higher top speeds. Easily increase power and speed by swapping out a 7.2V NiMH or 7.4V LiPo battery and replacing it with a Reedy 11.1V LiPo battery!

This high-power battery pack is designed specifically for use in R/C cars and trucks. A unique hard case design helps protect the battery from damage. Integrated locking nubs simulate sub-c cell profiles to allow the battery to be easily installed in a slotted touring car chassis. By simply flipping the battery over, perfect installation in off-road vehicles is achieved.

To reduce resistance and increase power, Reedy's 11.1V 20C LiPo battery comes equipped with TRA connector and 12AWG wires.

Reedy LiPo batteries offer many advantages over traditional NiMH batteries:

- Exclusive case design helps protect the battery from damage while allowing easy installation in touring car and off-road chassis
- Up to 30% longer runtime than NiMH batteries of equal capacity
- Lighter than NiMH batteries of equal capacity
- No limit to the number of consecutive uses
- Improved cell efficiency results in less energy lost as heat and greater power output
- Battery can be charged well in advance of use with no loss in performance
- Reduced maintenance
- Longer lifespan (up to 10 times!) reduces battery costs
- High-current TRA connector
- Balancing connector included - no complicated wiring required!

Specifications:

Length: 139mm
Width: 46mm
Height: 23.1mm excluding nubs /25.1mm including nubs
Weight: 300g
Discharge: 64A continuous, 80A-112A burst
Passes UN T1-T8 testing

UPC: 84695 00706 #706 Reedy LiPo 3200mAh 11.1V w/TRA \$189.99 Available: June 2008
