

For Immediate Release. July 15, 2008

Reedy LiPo for Transmitters, Receivers, Starter Boxes, and Micro Cars!

Enjoy the ease, duration, and power of LiPo batteries in your nitro racing components. A broad selection of Reedy LiPo batteries is now available to power servos and receivers, transmitters, and starter boxes. Worrying about battery life in long main events or consecutive bump-ups is a thing of the past. And turning over a hard-to-start nitro engine becomes much easier with a high-torque starter-box battery.

To operate receivers and servos with 7.4 LiPo batteries, install the optional heavy-duty 6.0V 5A regulator. It easily fits with the battery in the radio box, and prevents damage to gear that should not be exposed to more than 5 volts.

A new 1800mAh 7.4V battery specifically for Micro cars replaces 7.2V NiMH stick packs. Rated at 20C, it is capable of powering the very hottest 1:18 scale motors to incredible speeds.

Reedy LiPo batteries reduce hassle and expense so that you can better enjoy your racing experience.

UPC: 84695 00620	#620	Micro Pack 1800mAh 7.4V 20C	\$60.99	Available: Aug '08
UPC: 84695 00630	#630	Pro RX Battery 1600mAh 7.4V 10C	\$56.99	Available: Aug '08
