## New Reedy Battery Accessories!

Lower resistance means more power and longer runtimes. Reedy's new easy-to-install high-performance gold connectors provide a low-resistance connection in a compact package. Because they are available in two sizes, most applications are served.

Larger 4mm connectors are perfect for sub-C and LiPo battery connections while 3.5mm connectors are suited for brushless motor connections and 1:18 scale battery connections. In all cases, replacing high-resistance connectors with Reedy gold connectors improves all aspects of a vehicle's performance.

Single cell heat shrink is the best way to maintain the integrity of your matched sub-C cells. Protect your investment by using Reedy's single cell shrink wrap – test label data remains intact and short circuits are prevented.
