

New Product. For Immediate Release: November 2, 2009

Reedy 447-S AC/DC 4-7 Cell NiMH/NiCd Peak Prediction Charger

This innovative new charger is simple to use and offers the ability to charge the most popular NiMH/NiCd battery types and configurations.

The 447-S utilizes state-of-the-art peak prediction circuitry to protect batteries from damage due to overcharging. Standard peak detection circuitry continues charging even after the battery is fully charged, which can damage the battery. Instead, the 447-S continuously monitors the battery's charge curve, calculates when the peak will occur, and stops charging at that point.

Advanced Trickle Charge mode automatically begins when the battery is completely charged. This pulse current charge function keeps the battery charged until it is ready for use and conditions the cells to ensure maximum performance and longevity.

Features

- AC/DC power input
- Selectable charge rate of 1, 2, or 4 amps
- NiMH and NiCd compatible
- Charges 4-7 cell battery packs
- 8-bit microchip CPU controller
- LED and beeper charge status indicators
- Peak Prediction Circuitry
- Advanced Trickle Charge
- Fuse protection
- Tamiya-style connector
- Voltmeter jacks
- Receiver pack charge lead adapter

UPC: 84695 00610	#610	Reedy AC/DC 4-7 Cell NiMH/NiCd Charger	\$59.99	Available: Dec. '09

Perfect Charger For These Reedy Batteries!

#693 Reedy WolfPack 7.2V
2400 mAh NiMH,
MSRP \$39.99

#694 Reedy WolfPack
7.2V 3000 mAh NiMH,
MSRP \$49.99

#695 Reedy WolfPack
7.2V 3600 mAh NiMH,
MSRP \$59.99

#700 WolfPack
4200mAh 7.2V,
MSRP \$69.99
